

## Solar inverters M15A / M20A / M30A Flex

Quiet and compact inverters with Wi-Fi for easy integration into a WLAN network. The first choice for larger solar systems on residential and commercial buildings.

# Highlights

Easy commissioning and integration into the Wi-Fi network using a smartphone. System monitoring using a smartphone app or MyDeltaSolar Cloud.

M20A

- 2 MPP trackers (M30A: 3) for more flexibility in PV system design
- Lightweight with IP66 housing for harsh environmental conditions
- Natural convection for low-noise operation
- Integrated mechanical DC disconnecter
- Type 2 AC and DC surge protection devices
- Large front door for easy and safe access to internal components
- Integrated Wi-Fi for connecting to a smartphone or an Internet router
- Reactive power compensation 24/7
- Data point collection for string monitoring and I-V curve generation
- Arc fault and reverse polarity protection, Anti-PID feature

# Technical Data

| Input (DC)                                    | M15A Flex                         | M20A Flex                  | M30A Flex            |
|---|-----------------------------------|----------------------------|----------------------|
| Maximum input voltage <sup>1)</sup>           | 1100 V <sub>DC</sub>              |                            |                      |
| Operating voltage range                       | 200 to 1000 V <sub>DC</sub>       |                            |                      |
| MPP voltage range                             | 200 to 1000 V <sub>DC</sub>       |                            |                      |
| MPP voltage range with maximum power          | 380 to 900 V <sub>DC</sub>        | 480 to 900 V <sub>DC</sub> |                      |
| Nominal voltage                               | 600 V <sub>DC</sub>               |                            |                      |
| Maximum current (per MPP tracker/total)       | 25 A/45 A                         | 26 A/48 A                  | 30 A/72 A            |
| Maximum short-circuit current I <sub>SC</sub> | 50 A per MPP tracker              |                            |                      |
| Maximum number of MPP trackers                | 2 x 2 module strings              |                            | 3 x 2 module strings |
| DC surge protection devices                   | Type 2 (EN 50539-11), replaceable |                            |                      |

| Output (AC)                             | M15A Flex   | M20A Flex | M30A Flex |
|---|---|-----------|-----------|
| Maximum apparent power <sup>2)</sup>    | 16.5 kVA  | 22 kVA    | 33 kVA    |
| Maximum active power <sup>2)</sup>      | 16.5 kW   | 22 kW     | 33 kW     |
| Nominal apparent power <sup>2)</sup>    | 15 kVA  | 20 kVA    | 30 kVA    |
| Voltage range <sup>3)</sup>             | 230/400 V <sub>AC</sub> -20%/+30%; 3 phases + PE or 3 phases + N + PE |           |           |
| Maximum output current                  | 25 A  | 32 A      | 50 A      |
| Frequency range <sup>3)</sup>           | 50/60 Hz ± 5 Hz   |           |           |
| Adjustment range of power factor        | 0.8 cap to 0.8 ind  |           |           |
| Total harmonic distortion (THD)         | < 3% at nominal apparent power  |           |           |
| Consumption in night mode <sup>4)</sup> | < 2 W   |           |           |
| AC surge protection devices             | Type 2 (EN 61463-11), replaceable                                     |           |           |

| General specifications                   | M15A Flex   | M20A Flex     | M30A Flex     |
|--|---|---------------|---------------|

| Anti-islanding protection/grid regulation | VFR 2019 (Enedis-PRO-RES_10E, Enedis-PRO-RES_64E), VDE-AR-N 4105, EN 50549-1 |           |           |
| EMC                                       | EN 61000-6-2, EN 61000-6-3, EN 61000-3-11, EN 61000-3-12                     |           |           |
| Safety                                    | IEC 62109-1/-2; CE compliance  |           |           |

- 1) The maximum voltage withstand is 1100 VDC. The inverter starts working when the input voltage drops below 1000 VDC.
- 2)  $\cos \Phi = 1$  ( $VA = W$ )
- 3) AC voltage and frequency range are programmed based on the respective country regulations.
- 4) Night-time consumption with standby communication
